

Dear Reader:

We're so excited to announce the newest extension for your KIBO Robot Kit, that we wanted to get it to you before the summer: the [Building Brick Extension Set](#). This new Extension Set lets your students build with the world's most popular building bricks, including LEGO®, directly onto KIBO's body and Art Platform.

And if you buy any of the four [KIBO Robot Kits](#) between now and June 30, 2017, we'll include a Building Brick Extension Set for free!

The Building Brick Extension Set comes in two versions: the Basic, suitable for use with any KIBO Kit, and the Deluxe, which requires a KIBO 14, 18, or 21. Both sets include four building brick bases that fit into the four module ports on KIBO's body. The Deluxe set adds a purple building brick version of KIBO's famous Art Platform.

Students can use one, two, three, or all four of these building brick bases to build fabulous structures onto their KIBO body, while mixing and matching any combination of Sensor Modules and brick bases.

Or students can make a stationary or spinning building brick creation with the two-sided purple Art Platform included in the Deluxe Set.

If you buy at least one KIBO Robot Kit between now and June 30, 2017 we'll add one Building Brick Extension Set for free (limit: one free Building Brick Extension Set per customer). No need to select the free the Building Brick Extension Set at our web store—we'll add it automatically: a Basic Set with a KIBO 10 Kit or a Deluxe Set with any other KIBO Kit. Of course, you can buy as many Building Brick Extension Sets as you like, and if the order also contains at least one new robot kit, you'll get the additional Building Brick Extension Set for free.

At our web store, you can buy new [KIBO Robot Kits](#), and you can buy a la carte [Basic](#) or [Deluxe Building Brick Extension Sets](#).

KinderLab Robotics wishes you a wonderful summer!

Best Regards,
Mitch
